

smartwork

A WORKER CENTRIC AI SYSTEM FOR WORK ABILITY SUSTAINABILITY

What is SmartWork?

SMARTWORK IS A EUROPEAN PROJECT ADDRESSING A KEY CHALLENGE FACING TODAY'S OLDER GENERATION, AS THEY ARE LIVING AND WORKING LONGER THAN THEIR PREDECESSORS: THE DESIGN AND REALISATION OF AGE-FRIENDLY LIVING AND WORKING SPACES.

A Suite of Smart Services for 3 Target Groups:

1. OFFICE WORKER AGED 55-65

Work-support based on a user-centric AI system compiling health status, risk assessment and overall functional and cognitive capacity.

ubiWork

myWorkAbility

workCoach

2. EMPLOYERS

AI decision-support tools and optimal contextual knowledge management for increased efficiency and productivity of their office worker teams

digiTeam Service

3. CARERS

Continuous monitoring-support of overall health status and risks of the people they care for.

iCare Service

SmartWork will:

- ▶ Build a Worker-Centric AI System: a suite of smart services for 55-65 year old workers
- ▶ Support ageing people to work for longer
- ▶ Deliver benefits for older workers, employers and carers
- ▶ Actively engage end users in real-world settings at pilot sites in Coimbra (Portugal) and Aarhus (Denmark)

The Challenge

For workers to maintain an active professional life and independent living, despite the ageing process and the functional limitations, health conditions and/or care needs that this process frequently entails.
